September 1986

Reference Tables on the Major Producers and Consumers of Peanuts and Peanut Products

ORIGINAL

This publication contains tables with historical data on the supply and demand for peanuts and peanut products in major producing and/or consuming countries. The tables give annual data for most countries from 1972/73 to date on peanuts, peanut meal, and peanut oil. The data base on these countries was originally compiled in early 1980 and has been updated regularly. This data base has been the source of the aggregated data published in the monthly World Oilseeds Situation and Outlook circulars since May 1980.

The data sources include Agricultural Counselor and Attache reports, official statistics released by foreign governments, and trade publications.

The data base incorporates official trade statistics whenever possible. However, these statistics may be incomplete because peanuts and peanut products are not always separately identified in importing country trade statistics. In some cases, exporting countries trade data are used to estimate the imports of other countries.

Except for the major producing and processing countries, where data on the actual crush are readily available, crush statistics are generally estimated from local peanut production and imports. The extraction rate may vary over time as the country's oilseed processing industry is modernized. This rate will also tend to vary from year to year since the oil/meal content of peanuts is not uniform because of climatic and varietal factors.

Statistics on beginning and ending stocks are not available for all countries listed in the data base. These data are often compiled or published by entities other than those responsible for production, trade, or crush estimates. Usually such statistics are not complete, even when official. Although stock estimates are probably the weakest element in the supply and distribution estimates, their levels constitute an important part of the supply picture, particularly in the producing countries. In cases where stocks data are not available, any year-to-year adjustments in stocks are reflected in consumption.

The 12-month period used as a marketing year usually starts with the beginning of harvest and, therefore, varies by country. For example, the U.S. marketing year for peanuts and products starts in August.

G.M/VL

Approved by the World Agricultural Outlook Board - USDA

How To Interpret the Tables

1. The first column shows the analysis year. Analysis years are used to aggregate individual countries to arrive at world totals.

2. The second column shows the beginning month and year of the 12-month local marketing year represented by the data line. Where a marketing year starts in January (01), the calendar year is the same as the analysis year and all data are for the calendar year indicated. Where the marketing year starts in a different month, such as the U.S. peanut marketing year beginning in August (08), the data are for the 12 months starting with the first day of the month shown.

3. In the country peanut supply-distribution tables, the third and fifth columns show harvested area in thousands of hectares (1 HA = 2.471 acres) and production in thousands of metric tons farmers' stock (1 MT = 2,204.6 pounds). These area estimates are generally official estimates made by the respective countries. In some cases they may be the area planted if the country does not estimate harvested area. The peanut yield (column 4) is stated in farmers' stock metric tons per hectare and is derived by dividing total production by area harvested. Because of the rounding of both production and area estimates, the yield shown may differ slightly from yield estimates published elsewhere that have been derived from official unrounded area and production estimates.

4. The product yield shown on peanut meal and peanut oil supply/distribution tables is obtained by dividing meal or oil production by the quantity crushed. Wherever possible, actual crush and oil/meal production data are shown. Therefore, the product yield may vary from the standard or assumed extraction rates that are normally used.

5. Data on stocks may or may not include stocks at all positions. Where stock estimates are unavailable or not shown, total domestic use represents apparent consumption including changes in stocks.

6. The conversion factor USDA uses to convert reported shelled peanuts to equivalent farmers' stock is 1.33. The conversion factor used to convert foreign country shelled peanut statistics to equivalent farmers' stock is 1.43.

Do you need information about

- Overseas markets and buying trends?
- New competitors and products?
- Trade policy developments?
- Overseas promotional activities?

Then **Foreign Agriculture** — USDA's fact-filled monthly agricultural trade magazine — is for you. Based on official USDA data available nowhere else, **Foreign Agriculture** articles are clear and crisp, written to provide the export information you need, in a concise and extremely readable form.

Special information is found in **Foreign Agriculture's** telegraphed, targeted news departments: Fact File, Country Briefs, Trade Updates and Marketing News. And its tables and graphs will give you an immediate grasp of what's going on overseas.

In addition, periodic special issues—such as the one devoted entirely to value-added exports—will give you a wide range of detailed information about overseas markets.

If you use agricultural facts and figures in your business, you need **Foreign Agriculture.**

Subscribe today! Just $16.00 ($20.00 for foreign delivery) brings you Foreign Agriculture for 12 full months.

FAS Circulars: Market Information For Agricultural Exporters

As an agricultural exporter, you need timely, reliable information on changing consumer preferences, needs of foreign buyers, and the supply and demand situation in countries around the world.

The Foreign Agricultural Service can provide that information in its commodity circulars.

World agricultural information and updates on special FAS export services for the food and agricultural trade all are available in these periodic circulars.

For a sample copy of these reports—which can supply you with the information you need to make sound business decisions—check the box indicated, fill out the address form and mail it today.

To subscribe: Indicate which publications you want. Send a check for the total amount payable to the Foreign Agricultural Service. Only checks on U.S. banks, cashier's checks, or international money orders will be accepted. NO REFUNDS CAN BE MADE.
